Melanie was diagnosed with Triple Negative Breast Cancer in January 2016. After surgery for a double mastectomy, chemotherapy and radiation we thought the cancer was beat. In June of this year the breast cancer returned in the brain and cerebral spinal fluid. Radiation of the brain has been completed and chemotherapy has begun. Melanie is not able to work as she had multiple seizures which resulted in vision impairment. While Melanie has health insurance, medical bills have begun to add up quickly. All proceeds from this benefit will help Melanie pay her medical bills and expenses.

THANK YOU!!
